Question: 1

This question requires that you evaluate the underlined text to determine if it is correct.
You have a Power Apps app. You create a new version of the app and then publish the new version. A customer goes through the process of restoring the previous version of the app. In the Version tab for the app, you will see two versions of the app.
Review the underlined text. If it makes the statement correct, select `No change is needed.` If the statement is incorrect, select the answer choice that makes the statement correct.

    A. No change is needed.

    B. one

    C. three

    D. four

Answer: C
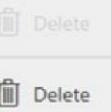

Explanation:

Restore a canvas app to a previous version in PowerApps.
1. Open powerapps.com, and then click or tap Apps in the left navigation bar.
2. Near the right edge, click or tap the info icon for the app that you want to restore.
3. Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore.

4. In the confirmation dialog box, click or tap Restore.
A new version is added to your list.

Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/restore-an-app

Question: 2

A company uses Dynamics 365 Sales. The company uses a browser-based app named Sales Hub. You need to ensure that users can access data from mobile devices.
Which app should users install?

    A. Dynamics 365 Remote Assist

    B. Dynamics 365 Finance

C. Dynamics 365 Business Central

D. Dynamics 365 for Phones

Answer: D

Explanation:
Use the Dynamics 365 for phones and Dynamics 365 for tablets apps for your sales, customer service, field service, and other tasks when you're on the go. With one download from your app store, you'll automatically have access to all the apps you need for your role. You will see apps with the new Unified Interface on your mobile device.

Reference:
https://docs.microsoft.com/en-us/dynamics365/mobile-app/dynamics-365-phones-tablets-users-guide

Question: 3

You are a customer service manager.
You need to implement a Power Apps portal that allows customers to submit cases. Which type of data source is used?

A. Dynamics 365 Connector

B. Microsoft SharePoint

C. Microsoft Azure Storage

D. Common Data Service

Answer: D

Explanation:

PowerApps Portals, the ability to build low-code, responsive websites which allow external users to interact with the data stored in the Common Data Service. https://powerapps.microsoft.com/en-us/blog/introducing-powerapps-portals-powerful-low-code-websites-for-external-users/

Question: 4

HOTSPOT -
You create a user-owned custom entity by using Common Data Service.
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE:
Each correct selection is worth one point.
Hot Area:

Answer Area

Statement	Yes	No
You can change the entity ownership from User to Organization-owned.	O	O
You can create a business rule for a custom entity that can be used in a Flow.	O	O

Answer:

Answer Area

Statement	Yes	No
You can change the entity ownership from User to Organization-owned.	O	O
You can create a business rule for a custom entity that can be used in a Flow.	O	O

Explanation:
Box 1: No -
Common Data Service supports two types of record ownership. Organization owned, and User or Team owned. This is a choice that happens at the time the entity is created and can't be changed.

Box 2: Yes -
By combining conditions and actions, you can do any of the following with business rules:

Set field values -

Clear field values -

Set field requirement levels -

Show or hide fields -

Enable or disable fields -
Validate data and show error messages
Create business recommendations based on business intelligence.

Reference:
https://docs.microsoft.com/en-us/power-platform/admin/wp-security-cds

Question: 5

DRAG DROP -
You need to explain the major components of the Common Data Model (CDM) and their functions.
Match each term to its definition.
Instructions: To answer, drag the appropriate term from the column on the left to its definition on the right. Each term may be used once, more than once, or not at all. Each correct match is worth one point.
NOTE: Each correct selection is worth one point.
Select and Place:

Tools

| Entities |
| Data connectors |
| Common Data Service |
| Common Data Model |
| Workflows |

Answer Area

Purpose	Tool
Helps jumpstart application development by leveraging business logic, security, and integrations.	Tool
A set of records used to store data.	Tool

Answer:

Tools

| Entities |
| Data connectors |
| Common Data Service |
| Common Data Model |
| Workflows |

Answer Area

Purpose	Tool
Helps jumpstart application development by leveraging business logic, security, and integrations.	Common Data Service
A set of records used to store data.	Entities

Explanation:
Box 1: Common Data Service -
Note: Common Data Service has been renamed to Dataverse.
By using Dataverse, you can jump-start app development by using the Common Data Model with business logic, security, and integration already built- in.

Box 2: Entities -
An entity is a set of records used to store data, similar to how a table stores data within a database.

Reference:
https://docs.microsoft.com/en-us/common-data-model/use
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-intro

Question: 6

A distribution company has multiple warehouses.
Tax rates charged on sales orders need to be calculated based on locality and region.
You need to recommend a cost-effective solution that can be implemented quickly. What should you recommend?

A. Check AppSource for a tax add-on.

B. Create alerts in Dynamics 365 Finance for tax table changes.

C. Implement the Common Data Model.

D. Run a Power BI report.

E. Write scripts and code tax updates.

Answer: D

Explanation:

Run a Power BI Report is the correct answer

Question: 7

DRAG DROP -

You manage the support team at a rapidly growing company.

Customers and support technicians need a better experience when logging and responding to support requests. You need more visibility into what the support technicians are doing every week.

You need to recommend tools to help the company's needs.

Which tools should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Tools

- Power Apps portal
- Power Automate
- Power BI
- Common Data Service

Answer Area

Requirement	Tool
Customers must be able to submit support requests by using a website.	
Support requests must be created and stored.	
Support technicians must be notified when a new support request is entered.	
Support technicians must be able to enter a status report for work completed during the previous week by using a mobile app.	

Answer:

Tools

- Power Apps portal
- Power Automate
- Power BI
- Common Data Service

Answer Area

Requirement	Tool
Customers must be able to submit support requests by using a website.	Power Apps portal
Support requests must be created and stored.	Common Data Service
Support technicians must be notified when a new support request is entered.	Power Automate
Support technicians must be able to enter a status report for work completed during the previous week by using a mobile app.	Power BI

Explanation:

Power Apps Portal

Common Data Service

Power Automate

Power BI

-
You are building Power Apps apps that use both Dynamics 365 Sales and Microsoft 365.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
Hot Area:

Answer Area

Statement	Yes	No
Dynamics 365 Sales and Microsoft 365 must be in the same tenant to allow Single Sign-On (SSO).	○	○
You must download a product from AppSource to ensure that SSO works with Dynamics 365 Sales and Microsoft 365.	○	○

Answer:

Answer Area

Statement	Yes	No
Dynamics 365 Sales and Microsoft 365 must be in the same tenant to allow Single Sign-On (SSO).	**○**	○
You must download a product from AppSource to ensure that SSO works with Dynamics 365 Sales and Microsoft 365.	○	**○**

Explanation:
Box 1: Yes

"For Microsoft 365 subscribers, the Dynamics 365 Customer Engagement apps instance must be in the same tenant as your Microsoft 365 subscription. A user account in Active Directory can only sync with one tenant."

Box 2: No -

Reference:

https://docs.microsoft.com/en-us/learn/modules/designing-power-platform-deployments/3-planning-the-deployment

Question: 9

You need to implement Microsoft Business Applications along with the Microsoft Power platform. Which three Microsoft products are part of the Power platform? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

   A. Power Apps
   B. Azure Active Directory
   C. Power Automate
   D. Azure Machine Learning
   E. Power BI

Answer: ACE

Explanation:

The Power Platform uses PowerApps, Power BI, and Power Automate (previously named Flow) to customize, extend, and build all the apps you need for your business and unlock the potential of Office 365 and Dynamics 365.

Reference:
https://docs.microsoft.com/en-us/learn/powerplatform/

Question: 10

HOTSPOT -
A company plans to implement Power Platform apps. The company does not plan to use any development tools or plug-ins.
Which actions can you perform?
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
Hot Area:

Answer Area

Statement	Yes	No
You can synchronize account information from Dynamics 365 Sales with a third-party database.	○	○
You can create invoices from orders and then send the invoices to the customer by using a Power Automate flow.	○	○

Answer:

Answer Area

Statement	Yes	No
You can synchronize account information from Dynamics 365 Sales with a third-party database.	○	○
You can create invoices from orders and then send the invoices to the customer by using a Power Automate flow.	○	○

Explanation:
The Power Platform uses PowerApps, Power BI, and Power Automate (previously named Flow) to customize, extend, and build all the apps you need for your business and unlock the potential of Office 365 and Dynamics 365.

Reference:
https://docs.microsoft.com/en-us/learn/powerplatform/

Question: 11

A large retail company implements Power Apps, Microsoft Flow, and the Common Data Service.
The board of directors is asking whether users are finding value in the technology. The company would like to measure and report usage of the software.
You need to recommend a tool to determine software usage.
What should you recommend?

    A. Microsoft Intune

    B. Azure Stream Analytics

    C. Power Platform Analytics

    D. Dynamics 365 Product Insights

Answer: C

Explanation:
The Power Platform Analytics Usage report is the default reports seen by the logged in environment admin. It provides total app launches and daily active users across all apps in the environment. Admins can filter the

view with attributes like device platform, player version, country, state, and city.

Reference:
https://docs.microsoft.com/en-us/power-platform/admin/analytics-powerapps

---

Question: 12   DRAG

DROP -
A company uses Power Apps.
You need to perform administrative tasks for the company.
Which admin centers should you use? To answer, drag the appropriate admin centers to the correct requirements.
Each admin center may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.
Select and Place:

Admin centers

| Azure Active Directory |
| Dynamics 365 Admin center |
| Power Apps Admin center |
| Power BI Admin portal |

Answer Area

Requirement	Admin center
Create user accounts for Power Apps.	Admin center
Assign the Environment Maker role to a user.	Admin center

Answer:

Admin centers

| Azure Active Directory |
| Dynamics 365 Admin center |
| Power Apps Admin center |
| Power BI Admin portal |

Answer Area

Requirement	Admin center
Create user accounts for Power Apps.	Azure Active Directory
Assign the Environment Maker role to a user.	Power Apps Admin center

Explanation:

Box 1: Azure Active Directory -

Create the company users in the Azure Active Directory.

Box 2: Power Apps admin center -

In the Power Apps Admin center, manage environments that you've created and those for which you have been

added to the Environment Admin or System

Administrator role. From the admin center, you can perform these administrative actions:

Create environments.

Rename environments.

Add or remove a user or group from either the Environment Admin or Environment Maker role.

Etc.

Incorrect Answers:

☞ Use the Dynamics 365 admin center to review the status of your apps and solutions, apply updates, and manage your Dynamics 365 instances, solutions, and apps.

☞ The Power BI admin portal enables you to manage a Power BI tenant for your organization. The portal includes items such as usage metrics, access to the

Microsoft 365 admin center, and settings

Note: You use the Microsoft 365 admin center to create user accounts for every user who needs access to model-driven apps in Dynamics 365, such as

Dynamics 365 Sales and Customer Service.

Reference:

https://docs.microsoft.com/en-us/power-platform/admin/environments-administration

https://docs.microsoft.com/en-us/dynamics365/marketing/dynamics-365-admin-center

Question: 13

A rapidly growing company produces Office 365 licenses for all employees. The company wants to empower users to build apps, automate business processes, and analyze data without requiring I| expertise or development skills and without increasing IT expenses and dependencies.

You need to recommend tools so that users can accomplish specific tasks.

Which tools should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Scenario	Application
Build automatic workflows that access multiple data sources.	▼

	Power Automate
	Azure Functions
	Power BI
Design insightful data visualizations.	▼
	AI Builder
	Power Apps
	Power Automate
	Azure Functions
	Power BI

Explanation:

Box 1: Power Automate -
Power Automate, formerly known as Microsoft Flow, is cloud-based software that allows employees to create and automate workflows and tasks across multiple applications and services without help from developers.

Box 2: Power Apps -
PowerApps is a suite of apps, services, connectors and data platform that provides a rapid application development environment to build custom apps for your business needs.

Box 3: Power BI -
Power BI is a business analytics solution that lets you‰visualize‰your data and share insights across your organization, or embed them in your app or website.
Connect to hundreds of data sources and bring your data to life with live dashboards and reports.

Reference:
https://docs.microsoft.com/en-us/powerapps/powerapps-overview

Question: 14

HOTSPOT -
A company plans to use Power Platform to build apps which address specific business challenges. You need to recommend the appropriate types of Power Apps to use.
What should you recommend? To answer, select the appropriate option in the answer area. NOTE:
Each correct selection is worth one point.
Hot Area:

Answer Area

| Scenario	Tool
Field technicians need a mobile app to capture the location and the image of defective products.	▼ Canvas app / Power Apps Portals / Common Data Service
Sales representatives need to see different views and dashboards in the sales app.	▼ Canvas app / Model-driven app / Power Apps Portals

Answer:

Answer Area

Scenario	Tool
Field technicians need a mobile app to capture the location and the image of defective products.	**Canvas app** ▼ Canvas app Power Apps Portals Common Data Service
Sales representatives need to see different views and dashboards in the sales app.	▼ Canvas app **Model-driven app** Power Apps Portals

Question: 15

DRAG DROP -

A travel company plans to use the Power Platform to create tools that help travel agents book customer travel. You need to recommend solutions for the company.

What should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Tools

- Business rule
- Business process flow
- Power Automate
- Power BI

Answer Area

Requirement	Tool
If a customer is travelling with a person under the age of 18, a field must display to collect date of birth for the under 18 traveler only.	
Ensure that all travel agents use the same process with all customers.	
Send a confirmation email to customers after reservations are complete.	

Answer:

Answer Area	
Requirement	**Tool**
If a customer is travelling with a person under the age of 18, a field must display to collect date of birth for the under 18 traveler only.	Business rule
Ensure that all travel agents use the same process with all customers.	Business process flow
Send a confirmation email to customers after reservations are complete.	Power Automate

Power BI

https://docs.microsoft.com/en-us/power-platform/admin/environments-overview

Question: 17

HOTSPOT -
You have version 1.0.0.0 of a published Power Apps app. You create and publish version 2.0.0.0 of the app. A customer goes through the process of restoring the previous version of the app.
How many versions of the app are displayed in the Version tab for the app? To answer, select the appropriate option in the answer area.
Hot Area:

Answer Area

You will see [▼] versions of the app.

1
2
3
4

Answer:

Answer Area

You will see [▼] versions of the app.

1
2
3
4
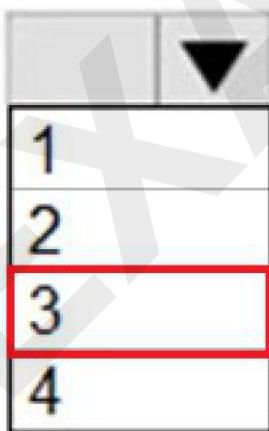

Explanation:

3. Provided versions 1.0.0.0.0 and 2.0.0.0.0 are both less than 6 months, the version restored by the customer

will be saved as version 3.0.0.0.0 which means there will now be 3 versions.

Question: 18

HOTSPOT -

A company is evaluating ways to connect Power Platform apps to external services to perform complex activities. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
You can create a canvas app that scans and parses documents using Azure Cognitive Services and then adds the appropriate information to Dynamics 365 Sales.	O	O
You can create a canvas app that uses Azure Cognitive Services to read incident records and identify tickets that need to be escalated based on sentiment score.	O	O

Answer:

Answer Area

Statements	Yes	No
You can create a canvas app that scans and parses documents using Azure Cognitive Services and then adds the appropriate information to Dynamics 365 Sales.	O	O
You can create a canvas app that uses Azure Cognitive Services to read incident records and identify tickets that need to be escalated based on sentiment score.	O	O

Explanation:

Reference:

https://docs.microsoft.com/en-us/azure/cognitive-services/cognitive-services-and-machine-learning

Question: 19

A company uses Power Platform.

You must ensure that users cannot share customer data with other users. You must also ensure that uses cannot connect to data sources unless you grant the user explicit permissions to access a data source.

You need to recommend solutions to meet the company's security requirements.

Which two types of policies should you recommend? Each correct answer presents part of the solution. NOTE:

Each correct selection is worth one point.

A. Office cloud policies
B. Group Policy Objects
C. environment-level policies
D. tenant-level policies
E. preset security policies

Answer: CD

Explanation:

Reference:
https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention https://docs.microsoft.com /en-us/power-platform/admin/create-dlp-policy

---

Question: 20

HOTSPOT -
An organization plans to create Power Platform solutions and is evaluating Microsoft Dataverse.
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE:
Each correct selection is worth one point.
Hot Area:

Answer Area

	Yes	No
Virtual table data is stored in Microsoft Dataverse.	O	O
Columns are used in forms and views.	O	O

Answer:

Answer Area

	Yes	No
Virtual table data is stored in Microsoft Dataverse.	O	**O**
Columns are used in forms and views.	**O**	O

Explanation:
Box 1: No -
A virtual table is a definition of a table in the Dataverse platform without the associated physical tables for

table instances created in the Dataverse database.
Instead during runtime, when a table instance is required, its state is dynamically retrieved from the associated external system.

Box 2: Yes -
Columns in forms: In the form designer, drag any columns from the Columns Explorer into the section on the form.

Reference:
https://docs.microsoft.com/en-us/powerapps/developer/data-platform/virtual-entities/get-started-ve

Question: 21

HOTSPOT -
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.
Hot Area:

Answer Area

	Yes	No
Managed solutions can be used to group multiple Power Platform components together during solution development.	O	O
Managed solutions must be used to distribute a Power Platform application on AppSource.	O	O
Managed solutions always protect Power Platform components from editing when components are exported to another environment.	O	O

Answer:

Answer Area

	Yes	No
Managed solutions can be used to group multiple Power Platform components together during solution development.	O	[O]
Managed solutions must be used to distribute a Power Platform application on AppSource.	[O]	O
Managed solutions always protect Power Platform components from editing when components are exported to another environment.	[O]	O

Explanation:

Box 1: No

Box 2: Yes

Box 3: Yes -

    You can't edit components directly within a managed solution. To edit managed components, first add them to an unmanaged solution.

Reference:

https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm

Question: 22

DRAG DROP -
A team of five people plans to create Power Platform solutions for a company. Team members plan to initially use Power Platform trial instances to create solutions.
Team members have questions about how many Power Platform instances and Common Data Service databases they need. You need to respond to the team.
How should you respond? To answer, drag the appropriate responses to the correct questions. Each response may be used once, more than once, or not at all.
You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.
Select and Place:

Responses

| One per user |
| One per tenant |
| One per environment |
| One per Power Platform app |

Answer Area

Question	Response
How many trial instances must the team create?	Response
How many Common Data Service databases must the team create?	Response

Answer:

Responses

| One per user |
| One per tenant |
| One per environment |
| One per Power Platform app |

Answer Area

Question	Response
How many trial instances must the team create?	One per environment
How many Common Data Service databases must the team create?	One per environment

Question: 23

A company is creating a canvas app to track and analyze customer visits to their retail stores. Data about customer visits is stored on-premises at each retail store location.
The app must display data about customer visits when users launch the app.
You need to ensure that the data is available for consumption by the app. Which tool should you use?

   A. Connector

   B. Microsoft Dataverse

C. Data source

D. Power Automate

E. Data gateway

Answer: E

Explanation:

A data gateway is a tool that allows you to connect to on-premises data sources, such as the customer visit data stored at each retail store location in this scenario. The data gateway acts as a bridge between the on-premises data and the cloud-based Power Platform, allowing the canvas app to access and display the customer visit data in real-time.

It is important to note that this is not a definitive answer and the final decision should be taken after a careful analysis of the company's infrastructure and the data source.

Question: 24

HOTSPOT -

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE:
Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
Security roles are modified in Microsoft Azure Active Directory.	○	○
Security Roles are assigned to each table.	○	○

Answer:

Answer Area

Statements	Yes	No
Security roles are modified in Microsoft Azure Active Directory.	○	○
Security Roles are assigned to each table.	○	○

Explanation:

Box 1: Yes -

You can't modify the built-in security roles, other than add administrative users. You can copy the role, make changes, and then save these changes as a new custom security role.

Note: A security role defines how different users, such as salespeople, access different types of records. To control access to data, you can modify existing security roles, create new security roles, or change which security roles are assigned to each user.

Box 2: No -
Security roles are assigned to users and to groups, not to tables.

Reference:
https://docs.microsoft.com/en-us/mem/configmgr/core/understand/fundamentals-of-role-based-administration#security-roles

Question: 25

A company currently does not separate testing, development and production as per standard Application Lifecycle Management (ALM) protocol. The company uses Power Apps for accounting and sales processes.
The company needs to use only one login account per user. The company also must prevent development and testing from impacting production.
You need to implement a solution to meet the requirements.
Which method should you select?

   A. separate environments

   B. separate tenants

   C. separate Microsoft Azure Storage Blobs

   D. separate connectors

Answer: A

Explanation:
To follow application lifecycle management (ALM) principles, you'll need separate environments for app development and production. Although you can perform basic ALM with only separate development and production environments, we recommend that you also maintain at least one test environment that's separate from your development and production environments.

Reference:
https://docs.microsoft.com/en-us/power-platform/alm/environment-strategy-alm

Question: 26

HOTSPOT -
A company creates the following Microsoft Power Platform environments to manage a custom model-driven app:✎ Development
✎ Production
You have been granted the System Administrator security role to the development environment and a custom security role named Project Team Member to the production environment.
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.
Hot Area:

Statements	Yes	No
You will not be able to access the app until the System Administrator security role is assigned to the app in the development environment.	○	○
You can delete records in the development environment.	○	○
You will not be able to access the app until the Project Team Member security role is assigned to the app in the production environment.	○	○

Answer:

Statements	Yes	No
You will not be able to access the app until the System Administrator security role is assigned to the app in the development environment.	○	●
You can delete records in the development environment.	●	○
You will not be able to access the app until the Project Team Member security role is assigned to the app in the production environment.	○	●

Explanation:

Box 1: No -

You already have this access as a System Administrator.

Users who have the Environment Maker, System Administrator, or System Customizer security role can access and edit all model-driven apps within the environment. This is because these security roles have create, read, and write privileges on the Model-driven App table.

Box 2: Yes -

If you are the System Administrator role in your CDS (Common Data Service), you would have full permission to customize or administer the environment, including creating, modifying, and assigning security roles.

Currently, within PowerApps, there is no way to prevent CDS System Administrator role from deleting a record in an Entity.

Box 3: No -

Other security options are available.

Also, there is no information on what the custom Project Team Member role entails.

Note: Apps can be viewed by valid users with appropriate privileges who sign into Power Apps, the Power Apps mobile app, or Dynamics 365 home page. For a user to view and access apps in an environment, the following privileges, security role, or team membership are required:
A user who has the write or create privilege on the Model-driven App table makes the user a maker persona. That user can view and access all apps in the environment.

A user who has only the read privilege on the Model-driven App table, must also have the associated security role(s) that are assigned to the app (or equivalent).

Reference:
https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/app-visibility-privileges https://docs.microsoft.com/en-us/power-platform/admin/database-security

Question: 27

DRAG DROP -
A company uses Dynamics 365 Sales.

You have the following requirements:
* View analytics on accounts.
* The model-driven app must automatically send an approval form to a manager when the purchase price is greater than $10,000.
* Create a chatbot for the webpage to interact with customer questions.
You must use Microsoft Power Platform to extend the capabilities of Dynamics 365 Sales.
You need to select an application for each requirement.
Which application should you use? To answer, drag the appropriate application to the correct requirement. Each application may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.
Select and Place:

Applications
- Power BI
- Power Automate
- Power Virtual Agents
- Power Portals

Answer Area

Requirement	Application
View analytics on accounts.	
Automatically send approval.	
Create chatbot for webpages.	

Answer:

Applications
- Power BI
- Power Automate
- Power Virtual Agents
- Power Portals

Answer Area

Requirement	Application
View analytics on accounts.	Power BI
Automatically send approval.	Power Automate
Create chatbot for webpages.	Power Virtual Agents

Explanation:

Box 1: Power BI -
You can configure Customer Service Analytics dashboards in Power BI.

Box 2: Power Automate -
Power Automate, Trigger a cloud flow based on email properties.
Use the When a new email arrives (V3) trigger to create a cloud flow that runs when one or more of the following email properties match criteria that you provide.

Box 3: Power Virtual Agents -
Power Virtual Agents lets you create powerful AI-powered chatbots for a range of requests"from providing simple answers to common questions to resolving issues requiring complex conversations.

Reference:
https://docs.microsoft.com/en-us/dynamics365/customer-service/configure-customer-service-analytics-dash board https://docs.microsoft.com/en-us/power-virtual-agents/fundamentals-what-is-power-virtual-agents htt ps://docs.microsoft.com/en-us/power-automate/email-triggers

Question: 28

HOTSPOT -
A company plans to use Power BI to visualize data from business systems.
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE:
Each correct selection is worth one point.
Hot Area:

Answer Area

Statement	Yes	No
You can display data aggregates and raw data in a Power BI report.	○	○
You can display related data from multiple sources in the same Power BI report.	○	○

Answer:

Answer Area

Statement	Yes	No
You can display data aggregates and raw data in a Power BI report.	●	○
You can display related data from multiple sources in the same Power BI report.	●	○

Explanation:
Box 1: Yes -
The following list provides advantages to using aggregations:
Query performance over big data - as users interact with visuals on Power BI reports, DAX queries are submitted to the dataset. Boost query speeds by caching data at the aggregated level, using a fraction of the resources required at the detail level. Unlock big data in a way that would otherwise be impossible.

Box 2: Yes -
With Power BI Desktop, you can connect to many different types of data sources, then shape the data to meet your needs, enabling you to create visual reports to share with others. Shaping data means transforming the data: renaming columns or tables, changing text to numbers, removing rows, setting the first row as headers, and so on. Combining data means connecting to two or more data sources, shaping them as needed, then consolidating them into a useful query.

Reference:
https://docs.microsoft.com/en-us/power-bi/desktop-aggregations https://docs.microsoft.com/en-us/power-bi/connect-data/desktop-shape-and-combine-data

Question: 29

A company is evaluating ways that they can implement AI Builder.
For which two scenarios can you use AI Builder? Each correct answer presents a complete solution. NOTE:
Each correct selection is worth one point.

A. Send emails to all users who subscribe to a service.
B. Synchronize data from an external database.

C. Collect data from several data sources and display a dashboard that shows trending data.

D. Interpret images and perform an action based on the image.

E. Detect patterns in data and predict outcomes.

Answer: DE

Explanation:

Reference:
https://powerapps.microsoft.com/en-us/blog/introducing-ai-builder-for-powerplatform/

Question: 30

HOTSPOT -
A company plans to create Power Platform apps that consume industry-standard and proprietary data sources. For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
Hot Area:

Answer Area

Statement	Yes	No
Custom connector cannot be used if a standard connector for the service is available.	○	○
Custom connectors are supported in instant flows only.	○	○
Standard and custom connectors cannot be mixed within the same flow or app.	○	○

Answer:

Answer Area

Statement	Yes	No
Custom connector cannot be used if a standard connector for the service is available.	○	**[○]**
Custom connectors are supported in instant flows only.	○	**[○]**
Standard and custom connectors cannot be mixed within the same flow or app.	○	**[○]**

Explanation:

Custom connector cannot be used if a standard connector for the service is available.

Answer: No

Custom connectors can be used even if a standard connector is available for a service. This might be necessary if the standard connector does not meet specific requirements or lacks certain functionalities that are needed.

Custom connectors are supported in instant flows only.

Answer: No
Custom connectors can be used in various types of flows in Power Automate, not just instant flows. They can be integrated into automated flows, scheduled flows, and business process flows as well.

Standard and custom connectors cannot be mixed within the same flow or app.

Answer: No
Both standard and custom connectors can be used within the same flow or app. This flexibility allows for more complex solutions that require the capabilities of both standard connectors and custom functionalities provided by custom connectors.

Question: 31   HOTSPOT
-

A company is evaluating Power Platform and has questions about the role that Microsoft Dataverse plays in using Power Apps and Power Automate.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
Hot Area:

Answer Area

Statement	Yes	No
Model-driven apps require a Microsoft Dataverse database.	○	○
A flow instance can only access one Microsoft Dataverse database.	○	○
Canvas apps require a Microsoft Dataverse database.	○	○

Answer:

Answer Area

Statement	Yes	No
Model-driven apps require a Microsoft Dataverse database.	○	○
A flow instance can only access one Microsoft Dataverse database.	○	○
Canvas apps require a Microsoft Dataverse database.	○	○

Explanation:

Yes

No

No

Reference:

Question: 32   HOTSPOT
-
A company plans to create a Common Data Service environment.
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE:
Each correct selection is worth one point.
Hot Area:

Answer Area

Statement	Yes	No
You can create a Common Data Service environment in the Power Platform Admin center.	○	○
You must enable data encryption after you create a Common Data Service environment.	○	○
You can control security roles and privileges in a Common Data Service environment from the Power Apps Admin center.	○	○

Answer:

Answer Area

Statement	Yes	No
You can create a Common Data Service environment in the Power Platform Admin center.	●	○
You must enable data encryption after you create a Common Data Service environment.	○	●
You can control security roles and privileges in a Common Data Service environment from the Power Apps Admin center.	●	○

Explanation:

1) Yes

2) No

3) Yes -

Capability of "Power Apps Admin Center" is now in "Power Platform Admin Center"

https://docs.microsoft.com/en-us/power-platform/admin/create-database https://docs.microsoft.com/en-

us/power-platform/admin/database-security

Question: 33

A company plans to use AI Builder to help improve business performance.
You need to determine which AI Models are available for use.
Which three types of models can you use? Each correct answer presents a complete solution. NOTE:
Each correct selection is worth one point.

    A. linear regression

    B. prediction

    C. object detection

    D. anomaly detection

    E. text classification

Answer: BCE

Explanation:

Reference:
https://docs.microsoft.com/en-us/ai-builder/model-types

Question: 34

A company uses Microsoft 365 and Dynamics 365 Sales. The company does not have any developers on its staff. You need to explain to the executives the benefits of using Power Platform apps.
What are two benefits? Each correct answer presents a complete solution. NOTE:
Each correct selection is worth one point.

    A. Users can send emails from Dynamics 365 Sales to their personal email addresses.

    B. Users can create Power Apps to create apps for different departments.

    C. Users can use Power Automate to share information between Microsoft 365 and Dynamics 365 Sales.

    D. The company can unify all the mobile devices to one vendor.

Answer: BC

Question: 35

HOTSPOT -
A company needs to create several workflows and applications to help streamline their sales operations. You need to determine which applications are appropriate for given scenarios.
Which applications should you use? To answer, select the appropriate options in the answer area. NOTE:
Each correct selection is worth one point.
Hot Area:

Answer Area

Scenario	Application
Create no-code workflows that use different systems.	[dropdown] Azure Logic Apps / Power Apps / Power Automate
Build no-code mobile application.	[dropdown] Azure Logic Apps / Power Apps / Power Automate
Build a mobile application by using Microsoft Dataverse.	[dropdown] Azure Logic Apps / Power Apps / Power Automate

Answer:

Answer Area

Scenario	Application
Create no-code workflows that use different systems.	[dropdown] Azure Logic Apps / Power Apps / **Power Automate**
Build no-code mobile application.	[dropdown] Azure Logic Apps / **Power Apps** / Power Automate
Build a mobile application by using Microsoft Dataverse.	[dropdown] Azure Logic Apps / **Power Apps** / Power Automate

Explanation:

Reference:
https://docs.microsoft.com/en-us/power-automate/getting-started https://docs.microsoft.com/en-us/azure/logic-apps/logic-apps-overview https://powerapps.microsoft.com/pl-pl/blog/business-model-may/

Question: 36

A company uses Dynamics 365 Supply Chain Management and Dynamics 365 Finance. User account data must be synchronized between the two systems.
You need to ensure that the synchronized data is stored in one place.
What should you use?

  A. Azure IoT Central
  B. Azure Active Directory

C. SQL Server

D. Microsoft Dataverse

Answer: D

Question: 37

What is a benefit of deploying Microsoft 365 and Dynamics 365 apps in the same tenant?

   A. Use Common Data Services to connect to application data.

   B. You only need to set up groups in Microsoft 365 for permissions to all data.

   C. Users can access both Microsoft 365 and Dynamics 365 by using Single Sign-on (SSO).

Answer: C

Explanation:

When your Office 365 and Dynamics 365 are in different tenants it becomes quite the challenge and inconvenience. A few major issues are as follows Server-Side Sync – only supports single tenant. Single sign-on – need to log into two systems. https://bethb-d365.com/2018/06/13/dynamics-365-and-office-365-in-different-tenants-how-to-consolidate/#post-39:~:text=When%20your%20Office%20365%20and%20Dynamics,need%20to%20log%20into%20two%20system

Question: 38

HOTSPOT -

You are creating a Power Apps app. You want to ensure that the app can be used by individuals who have a vision impairment.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
Power Apps can use a screen reader without the need for a connector.	○	○
You can use an accessibility checker for Power Apps apps to check for accessibility violations and provide user interface tips.	○	○

Answer:

Answer Area

Statement	Yes	No
Power Apps can use a screen reader without the need for a connector.	○	⬤
You can use an accessibility checker for Power Apps apps to check for accessibility violations and provide user interface tips.	⬤	○

Explanation:

Box 1: No -

The following software combinations are the supported recommendations for consuming PowerApps with a screen reader:

↪ Windows: Microsoft Edge / Narrator

↪ macOS: Safari / VoiceOver

↪ Android: PowerApps app / Talkback

↪ iOS: PowerApps app / VoiceOver

Box 2: Yes -

Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the Accessibility checker in PowerApps Studio. This tool not only finds potential accessibility issues but also explains why each might be a potential problem for users who have a specific disability and offers suggestions on how to resolve each issue. The Accessibility checker detects screen-reader and keyboard issues for you, and you can find information about how to fix color-contrast issues by using accessible colors.

Reference:

https://docs.microsoft.com/en-us/powerapps/user/screen-reader https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker

Question: 39

DRAG DROP -

A bank uses Power Platform apps and flows to support business processes.

The company would like to use historical client data to predict whether a client's loan application is likely to be approved or rejected.

You need to use AI Builder to implement the solution.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Answer Area

Actions

Train the model.

Use the model in PowerApps or Power Automate.

Export data into AI Builder.

Publish the model.

Import data into Common Data Service.

Answer:

Answer Area

Actions	
Train the model.	
Use the model in PowerApps or Power Automate.	
Export data into AI Builder.	
Publish the model.	
Import data into Common Data Service.	

Answer Area:
- Import data into Common Data Service.
- Train the model.
- Publish the model.
- Use the model in PowerApps or Power Automate.

Explanation:

Step 1: Import data into Common Data Service.

AI Builder requires the use of Common Data Service, which is the data platform for PowerApps and allows you to store and manage business data. Common Data
Service is the platform on which Dynamics 365 apps are built so if you're a Dynamics 365 customer, your data is already in Common Data Service.

Step 2: Train the model -

Step 3: Publish the model -
The last step is to publish your model.
Step 4: Use the model in PowerApps or Power Automate.

Reference:
https://docs.microsoft.com/en-us/ai-builder/build-model

Question: 40

DRAG DROP -
A company plans to implement solutions that use Microsoft Dataverse.
You need to recommend features to meet the company's needs.
Which features should you recommend? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.
Select and Place:

Features

- business rules
- business process flows
- Common Data Model

Answer Area

Requirement	Feature
Validate data across multiple fields and entities regardless of the app used to create data.	Feature
Create visual guides to ensure that users enter data and perform tasks in a consistent manner.	Feature
Accelerate development by using a standard set of entities for the most common scenarios.	Feature

Answer:

Features
business rules
business process flows
Common Data Model

Answer Area

Requirement	Feature
Validate data across multiple fields and entities regardless of the app used to create data.	business rules
Create visual guides to ensure that users enter data and perform tasks in a consistent manner.	business process flows
Accelerate development by using a standard set of entities for the most common scenarios.	Common Data Model

Explanation:

Box 1: business rules -

You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.

Box 2: business process flows -

Flows Power Automate includes several types of processes, each designed for a different purpose: ☞ Automated flows. Create a flow that performs one or more tasks automatically after it's triggered by an event.

☞ Button flows. Perform repetitive tasks simply by tapping a button on your mobile device.

☞ Scheduled flows. Create a flow that performs one or more tasks on a schedule such as once a day, on a specific date, or after a certain time.

☞ Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.

☞ Workflows and actions. Dynamics 365 customizers may be familiar with the classic Common Data Service processes, which are workflows and actions.

Box 3: Common Data Model -

Model-driven app design is a component-focused approach to app development. Model-driven app design doesn't require code and the apps you make can be simple or very complex. Unlike canvas app development where the designer has complete control over app layout, with model-driven apps much of the layout is determined for you and largely designated by the components you add to the app.

Reference:

https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/guide-staff-through-common-tasks-processes https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/model-driven-app-overvie w

Question: 41

DRAG DROP -

A manufacturing company is evaluating AI Builder.

You need to select AI Builder models to address specified requirements.

Which model types should you use? To answer, drag the appropriate model types to the correct requirements. Each model type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Model types

prediction	
form processing	
object detection	

Answer Area

Requirement	Model type
Identify products without labels or serial numbers.	
Identify customers who might not pay their invoices on time.	

Answer:

Model types

form processing

Answer Area

Requirement	Model type
Identify products without labels or serial numbers.	object detection
Identify customers who might not pay their invoices on time.	prediction

Explanation:

Reference:

https://docs.microsoft.com/en-us/ai-builder/object-detection-model-in-flow https://docs.microsoft.com/en-us/ai-builder/prediction-overview

---

Question: 42

DRAG DROP -
You manage the support team at a rapidly growing company.
Support technicians need a better experience when logging and responding to support requests.
You need to recommend tools to help the company's needs.
Which tools should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.
Select and Place:

Tools

Power Apps
Power Automate
Power BI
Microsoft Dataverse

Answer Area

Requirement	Tool
Support technicians must be able to submit support requests by using an app.	
Customer data must be stored and synchronized with Dynamics 365 Finance.	
Support technicians must be notified when a new support request is entered.	

Answer:

Tools	Answer Area	

Tools

Power Apps
Power Automate
Power BI
Microsoft Dataverse

Answer Area

Requirement	Tool
Support technicians must be able to submit support requests by using an app.	Power Apps
Customer data must be stored and synchronized with Dynamics 365 Finance.	Microsoft Dataverse
Support technicians must be notified when a new support request is entered.	Power Automate

Explanation:

Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/help-desk-install https://docs.microsoft.com/en-us/power-platform/admin/data-integrator https://docs.microsoft.com/en-us/power-automate/getting-started

Question: 43

HOTSPOT -
A business is evaluating AI Builder.
Which actions can you perform?
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE:
Each correct selection is worth one point.
Hot Area:

Answer Area

Statement	Yes	No
You can use a text classification model in AI Builder to retrieve text and perform sentiment analysist for ServiceNow incidents.	○	○
You can tag Instagram posts that mention your new product.	○	○
You can send results about the number of mentions of your new product in Instagram to Power BI for inclusion on a dashboard.	○	○

Answer:

Answer Area

Statement	Yes	No
You can use a text classification model in AI Builder to retrieve text and perform sentiment analysist for ServiceNow incidents.	O	O
You can tag Instagram posts that mention your new product.	O	O
You can send results about the number of mentions of your new product in Instagram to Power BI for inclusion on a dashboard.	O	O

Explanation:

1) Yes - Core feature of AI builder

2) Yes - AI Builder actions

3) Yes - AI Builder actions

Power Automate offers "AI Builder actions" that enable usage of all model types in flows. Adding AI Builder actions in your flow allows you to:

1) Perform model inference by using outputs of upstream actions (email attachments received, SharePoint files dropped, created records in a Common Data Service entity, and so on).

2) Process model inference results in downstream actions (send by email, store in Common Data Service records, message in Teams, and so on).

https://docs.microsoft.com/en-us/ai-builder/create-text-classification-model https://radacad.com/object-detector-app-with-ai-builder-and-power-apps

Question: 44   DRAG

DROP -

Match each tool to its task. To answer, drag the appropriate tool from the column on the left to its task on the right. Each tool may be used once, more than once, or not at all.
NOTE: Each correct match is worth one point.
Select and Place:

Tools

Power BI
Power Automate
Power Apps

Answer Area

Task	Tool
Automate workflows.	Tool
Trigger an action from an event.	Tool
Create a custom mobile data entry screen.	Tool

Answer:

Tools

Power BI
Power Automate
Power Apps

Answer Area

Task	Tool
Automate workflows.	Power Automate
Trigger an action from an event.	Power Automate
Create a custom mobile data entry screen.	Power Apps

Explanation:

Reference:

https://docs.microsoft.com/en-us/power-automate/getting-started https://docs.microsoft.com/en-us/powerap ps/maker/portals/compose-page#add-form

Question: 45

HOTSPOT -

You are a retail director for a large clothing company. Each week you use the corporate YouTube channel to create a video that highlights new initiatives, and goals for retail operations.

You need to design a Power Apps app that streams the videos to internal users.

Which objects should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Action	Option
Implement the Power Apps app.	▼
	Canvas
	Model-driven
	Portal
Use drag and drop to add a video to the app.	▼
	View
	Connector
	Control
Apply consistent company colors to the app.	▼
	Unified Interface
	Control
	Theme
	Template

Answer:

Answer Area

Action	Option
Implement the Power Apps app.	**Canvas** ▼
	Canvas `[highlighted]`
	Model-driven
	Portal
Use drag and drop to add a video to the app.	▼
	View
	Connector
	Control `[highlighted]`
Apply consistent company colors to the app.	▼
	Unified Interface
	Control
	Theme `[highlighted]`
	Template

Explanation:
Implement the Power Apps app.

Choice: Canvas
A Canvas app in Power Apps is ideal for creating a custom app experience where you can embed media and design the layout freely, which is suitable for an app intended to stream videos.

Use drag and drop to add a video to the app.

Choice: Control
In Power Apps, you would use a 'Control' (specifically, the Video control or Media control) to embed and display videos in the app. These controls can be added to the app's canvas through a drag-and-drop interface. Apply consistent company colors to the app.

Choice: Theme
To apply consistent company colors to the app, you would use 'Themes' in Power Apps. Themes allow you to apply a consistent set of colors and styles across the app, ensuring brand consistency and a uniform look and feel.

Question: 46

HOTSPOT -
You want to create a Power Apps app that allows you to define a custom Sitemap. What should you do? To answer, select the appropriate options in the answer area.
Hot Area:

Answer Area

Navigate to the Power Apps portal and create [▼]

| a canvas app. |
| a model-driven app. |
| a portal app. |
| an app by using a template. |

Answer:

Answer Area

Navigate to the Power Apps portal and create [▼]

| a canvas app. |
| **a model-driven app.** |
| a portal app. |
| an app by using a template. |

Explanation:

Reference:
https://docs.microsoft.com/en-us/powerapps/powerapps-overview

Question: 47

A company is building apps to support their business operations. The apps will use connectors to access data from several data sources and respond to a number of events generated by components.
Which two operations can you use for connectors? Each correct answer presents part of the solution. NOTE:
Each correct selection is worth one point.

A. Actions

B. Plug-ins

C. Gateways

D. Triggers

Question: 48

You are a sales manager for a large retail organization.
You are creating a Power Apps app that will display customer product purchase information from your old point-of-sale (POS) system and need to link those sales to the customer accounts and product sales in Dynamics 365 Commerce.
You need to use the appropriate component.
What should you use?

A. Microsoft Dataverse

B. business process flow

C. entity metadata

D. business rule

Answer: A

Question: 49

You create a Power Virtual Agents chatbot.
You need to share the bot with other team members so that they can try out the bot before you share the bot with customers.
What should you use?

A. demo website

B. live production website

C. test chat feature

Answer: A

Explanation:

Demo website

https://docs.microsoft.com/en-us/power-virtual-agents/publication-connect-bot-to-web-channels

Question: 50

HOTSPOT -
You are planning to use the Business Card Reader and Sentiment Analysis prebuilt AI models to build solutions. For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
Hot Area:

Answer Area

Statement	Yes	No
The Business Card Reader model can be used with both Power Automate and Power Apps.	○	○
The Sentiment Analysis model can be used Power Automate only.	○	○

Answer:

Answer Area

Statement	Yes	No
The Business Card Reader model can be used with both Power Automate and Power Apps.	●	○
The Sentiment Analysis model can be used Power Automate only.	○	●

Explanation:

1. yes

2. NO

Question: 51

HOTSPOT -

Your company wants to create a help desk system and implement Dynamics 365 Customer Service.

The company has the following requirements:

✑ Provide an application to allow support team staff to chat live with a customer.

✑ Automatically import data from a Microsoft Excel spreadsheet once a day.

✑ Provide a chatbot that can assist customers who need support.

You need to determine which applications to use to meet the requirements.

Which applications should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement	Application
Automatically import data from a Microsoft Excel spreadsheet once a day.	[▼]
	Custom Connector
	Azure Data Lake
	Power Automate
	Power BI
Provide a chatbot that can assist customers who need support.	[▼]
	Power Virtual Agent
	Power Automate

Answer:

Answer Area

Requirement	Application
Automatically import data from a Microsoft Excel spreadsheet once a day.	[▼]
	Custom Connector
	Azure Data Lake
	Power Automate
	Power BI
Provide a chatbot that can assist customers who need support.	[▼]
	Power Virtual Agent
	Power Automate

Explanation:

Reference:
https://docs.microsoft.com/en-us/power-virtual-agents/fundamentals-what-is-power-virtual-agents
A 10-step Guide to Excel Automation using Power Automate Desktop | by Utkarsh Shahdeo | Medium

Question: 52

You create a business rule on contact entity to enforce the requirement that users must enter either a telephone number, fax number, or an email when creating a new record.
The company decides to remove fax number from the condition.
You need to update the business rule.
What are two ways of achieving the goal? Each correct answer presents a complete solution. NOTE:
Each correct selection is worth one point.

A. Save a copy of the rule and change the condition. Deactivate and delete the original rule.

B. Deactivate the business rule and change the condition.

C. Take a snapshot of the business rule and change the condition.

D. Change the condition and activate the change.

Answer: AB

Explanation:

you can't change anything without deactivating it first

Question: 53

HOTSPOT -
You are learning about Power Apps and how to use triggers.
Which objects should you use? To answer, select the appropriate options in the answer area. NOTE:
Each correct selection is worth one point.
Hot Area:

Answer Area

Statement	Component
When a condition is met, Power Apps app can trigger a	▼
	connector.
	Power Automate flow.
	gateway.
	solution.
Actions and triggers are properties of a	▼
	connector.
	gateway.
	solution.

Answer:

Answer Area

Statement	Component
When a condition is met, Power Apps app can trigger a	**▼**
	connector.
	Power Automate flow.
	gateway.
	solution.
Actions and triggers are properties of a	**▼**
	connector.
	gateway.
	solution.

Explanation:

Box 1 Power Automate flow.

Box2 : Connectors (A connector is a proxy or a wrapper around an API that allows the underlying service to talk to Microsoft Power Automate, Microsoft Power Apps, and Azure Logic Apps. It provides a way for users to connect their accounts and leverage a set of prebuilt actions and triggers to build their apps and workflows.)
https://learn.microsoft.com/en-us/connectors/connectors

Question: 54

A coworker is creating an app in Power Apps and needs to automatically synchronize data from an external source. The coworker is unable to locate a suitable
Microsoft approved connector template in AppSource.
You need to recommend a solution for the coworker.
What should you recommend?

   A. Create a custom connector.

   B. Ask the outside source to send you the data once a week.

   C. Use Power Automate to connect to the database.

   D. Open a ticket with Microsoft and request a new connector.

   E. Use Microsoft Azure Service Bus.

Answer: A

Explanation:
There are 250 + predefined connectors that you can use in your PowerApps and in your Microsoft Flows. If you do not find any that suits your needs, you have the possibility to create a Custom Connector.

Note: A Custom Connector is a wrapper around a REST API (Logic Apps also supports SOAP APIs) that allows Logic Apps, Microsoft Flow, or PowerApps to communicate with that REST or SOAP API.

https://carinaclaesson.com/2019/09/06/setting-up-a-custom-connector-from-an-openapi-file-and-utilizing-it-in-powerapps-and-flow/

Question: 55

A toy company creates a text classification model in AI Builder to monitor customer feedback for specific key words. When negative feedback is received for a toy, the company wants to proactively perform engineering reviews for the toy and schedule additional training sessions for workers who produce the toy.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

    A. Create a canvas app.
    B. Implement the Virtual Agent.
    C. Build a Power Automate flow.
    D. Use the Common Data Model.

Answer: AC

Explanation:

A (not D): AI Builder comes with:

A ready-to-use business card reader available in canvas as well as in model-driven apps.

Business card reader (Canvas)

Business card reader (Model-driven)

Additional canvas components to leverage your AI Builder form processing or object detection models canvas apps.

C: Use the results from your AI model across Power Platform to create end-to-end solutions that meet your business needs, even if you have no coding skills. For example, create a flow that automates document processing in Power Automate, or an app created with PowerApps that predicts whether a supplier will be out of compliance.

Question: 56

HOTSPOT -

A company is evaluating AI Builder.

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

	Yes	No
Prebuilt AI Builder models are pretrained and are ready to interpret business data immediately.	○	○
Answer: Prebuilt AI Builder models exist for both Power Automate and Power Apps.	○	○

Answer Area

	Yes	No
Prebuilt AI Builder models are pretrained and are ready to interpret business data immediately.	○	○
Prebuilt AI Builder models exist for both Power Automate and Power Apps.	○	○

Explanation:

Reference:
https://docs.microsoft.com/en-us/ai-builder/prebuilt-overview

---

Question: 57

DRAG DROP -

You are implementing a solution for an animal hospital.

The animal hospital must contact owners regarding their pets.

You need to model the owner and pet object information by using Microsoft Dataverse. The solution must minimize the amount of customization required:

☞ owner first name

☞ owner last name

☞ owner email address

☞ owner date of birth

☞ pet name

▪ pet breed

☞ pet owner

Which component should you use? To answer, drag the appropriate components to the correct data. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Components	Data	Component
Standard Dataverse table	The owner object	
Custom Dataverse table	The pet object	
Column	The owner's email address	
Relationship	Reference a pet record as belonging to an owner record	

Answer:

Answer Area

Components	Data	Component
Standard Dataverse table	The owner object	Standard Dataverse table
Custom Dataverse table	The pet object	Custom Dataverse table
Column	The owner's email address	Column
Relationship	Reference a pet record as belonging to an owner record	Relationship

Explanation:

Box 1: Standard Dataverse table -

Standard: Several standard tables, also known as out-of-box tables, are included with a Dataverse environment. Account, business unit, contact, task, and user tables are examples of standard tables in Dataverse. Most of the standard tables included with Dataverse can be customized.

Box 2: Standard Custom Dataverse table

Custom: Custom tables are unmanaged tables that are either imported from an unmanaged solution or are new tables created directly in the Dataverse environment.

https://docs.microsoft.com/en-us/power-apps/maker/data-platform/types-of-entities

Question: 58

DRAG DROP -

A company plans to build canvas apps that will be used within Microsoft Teams.

You need to identify the platform based on the design considerations.

To answer, drag the appropriate platforms to the correct design considerations. Each platform may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Select and Place:

Answer Area

Platforms	Design consideration	Platform
Dataverse	Limit the number of rows to less than one million that can exist for an application in Teams.	
Dataverse for Teams	Ensure that professional developers have as many features available as possible, such as API access, plug-ins, and more, when developing applications for use within Teams.	

Answer:

Answer Area

Platforms	Design consideration	Platform
Dataverse	Limit the number of rows to less than one million that can exist for an application in Teams.	Dataverse for Teams
Dataverse for Teams	Ensure that professional developers have as many features available as possible, such as API access, plug-ins, and more, when developing applications for use within Teams.	Dataverse

Explanation:

Box 1: Dataverse for Teams -

Over time, the data stored in the Dataverse for Teams environment will grow and eventually reach the capacity limit that these environments have (2 GB). At this point, existing apps will continue to operate but new applications won't be allowed to be created or installed. Customers will be directed to contact a tenant admin to upgrade the Dataverse for Teams environments to Dataverse and obtain more capacity.

Box 2: Dataverse -

Reference:

https://docs.microsoft.com/en-us/power-platform/admin/about-teams-environment

Question: 59

You need to display sales orders greater than a specific threshold in a Power BI report.
What should you use?

    A. filter
    B. Power Query
    C. Common Data Service
    D. connector

Answer: A

Explanation:

filtering (A) is the best option for DISPLAY-ing a selection of data.

Question: 60

You are a sales representative. You create a Power BI report to visualize data from a Microsoft Excel workbook. Users need to be able to view and share the report.

Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

    A. Pin the report to a dashboard.
    B. Export the data.
    C. Publish the dashboard.
    D. Share the dashboard.

Answer: AD

Explanation:

Reference:
https://docs.microsoft.com/en-us/power-bi/create-reports/service-dashboard-pin-live-tile-from-report https:/
    /docs.microsoft.com/en-us/power-bi/collaborate-share/service-share-dashboards#limitations-and-considerati
ons

Question: 61

HOTSPOT -
You create reports within Power BI to report on the status of a project. A manager asks you to share the reports with other team members. You decide to create a published app and set permissions to allow other team members to view the reports. For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
Hot Area:

Answer Area

Statement	Yes	No
The Power BI published app is stored within the Team site so that others can install it.	○	○
One of the other project managers installs and modifiers a dashboard within the Power BI published app. The changes are automatically made into the original published app.	○	○

Answer:

Answer Area

Statement	Yes	No
The Power BI published app is stored within the Team site so that others can install it.	○	[○]
One of the other project managers installs and modifiers a dashboard within the Power BI published app. The changes are automatically made into the original published app.	○	[○]

Explanation:

1. NO

2. NO

First is no because there are 2 ways

First, you can share that URL with them. The first time they go to the URL, they're asked if they want to install the app. If they click Add, it's added to the Apps section of their Power BI site.

Second, they can click Get apps in the Apps section of the Power BI service. Microsoft AppSource opens, where they see all the apps that have been shared with them, including the app that you most recently shared with them. If the organization has a lot of apps, they may need to search for it.

Either way, after that whenever they go to Apps, they'll see this app in their list.

They can also install the app from their iOS, Android, or Windows device by clicking the link in the email. The app installs automatically and opens in the default landing page.

Reference:

https://powerbi.microsoft.com/en-us/blog/distribute-to-large-audiences-with-power-bi-apps/

Question: 62

DRAG DROP -
A company plans to create an information portal that managers can use to view critical information about their teams.
You need to recommend the type of Power BI components that the company should use.
What should you recommend? To answer, drag the appropriate component types to the correct requirements. Each component type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE. Each correct selection is worth one point.
Select and Place:

Component types

| Dashboard |
| Report |

Answer Area

Requirement	Component type
Display data from a Microsoft Excel workbook that has multiple worksheets into one chart.	Component type
Display the top departmental goal metrics and alert users when specific thresholds targets are met.	Component type
Display Sales charts that can be filtered by region.	Component type

Answer:

Component types

| Dashboard |
| Report |

Answer Area

Requirement	Component type
Display data from a Microsoft Excel workbook that has multiple worksheets into one chart.	Report
Display the top departmental goal metrics and alert users when specific thresholds targets are met.	Dashboard
Display Sales charts that can be filtered by region.	Report

Explanation:
Box 1: Report -
Reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc.

Box 2: Dashboard -

Dashboards are a business key performance indicator view where it displays key values that can change business profits and can be glanced at one screen.

Box 3: Report -
Power BI dashboards cannot slice and dice, but reports have many ways to filter and slice.

Note: Power BI dashboards are one placeholder to display the most important decision-making facts to run a business. But reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc. Reports are based on one dataset or one business unit data for example reports of a store belonging to California.

Reference:
https://www.educba.com/power-bi-dashboard-vs-report/

Question: 63

HOTSPOT -
You have a Power BI report.
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.
Hot Area:

Answer Area

Statement	Yes	No
You can export data from a visualization in a Power BI report.	O	O
You can show the data behind a visual report on your screen without exporting the data.	O	O
You can export data to view supporting data for a KPI.	O	O

Answer:

Answer Area

Statement	Yes	No
You can export data from a visualization in a Power BI report.	O	O
You can show the data behind a visual report on your screen without exporting the data.	O	O
You can export data to view supporting data for a KPI.	O	O

Explanation:

Box 1: Yes -

If you'd like to see the data that Power BI uses to create a visualization, you can display that data in Power BI. You can also export that data to Excel as an .xlsx or

.csv file. The option to export the data requires a Pro or Premium license and edit permissions to the dataset and report.

Note: Export data from a Power BI dashboard

1. Select the ellipsis in the upper-right corner of the visualization.

2. Choose the Export data icon.

3. Power BI exports the data to a .csv file. If you've filtered the visualization, then the app will filter the downloaded data.

4. Your browser will prompt you to save the file. Once saved, open the .csv file in Excel.

Box 2: Yes

Box 3: Yes -

A KPI dataset needs to contain goal values for a KPI. If your dataset doesn't contain goal values, you can create them by adding an Excel sheet with goals to your data model or PBIX file.

Note: A Key Performance Indicator (KPI) is a visual cue that communicates the amount of progress made toward a measurable goal.

Question: 64 You

create a Power BI dashboard that displays data from Dynamics 365 Customer Engagement.
You need to share the Power BI dashboard with coworkers.
What are three possible ways to achieve the goal? Each correct answer presents a complete solution. NOTE:
Each correct selection is worth one point.

   A. Create a Power BI workspace and grant coworkers permissions.
   B. Publish the dashboard as an app to your coworkers.
   C. Export the data into Common Data Service for others to manipulate in Power BI.
   D. Export the data to Microsoft Excel for coworkers to import and view in Power BI.
   E. Embed reports in your company's internal web portal.

Answer: ABE
Explanation:
A: Basic Sharing for Dashboards and Reports through a workspace is the most common way of sharing the Power BI content. Basic Sharing is very simple and easy to use method. You can simply click on the Share button in the dashboard or report, and then share it with other users.
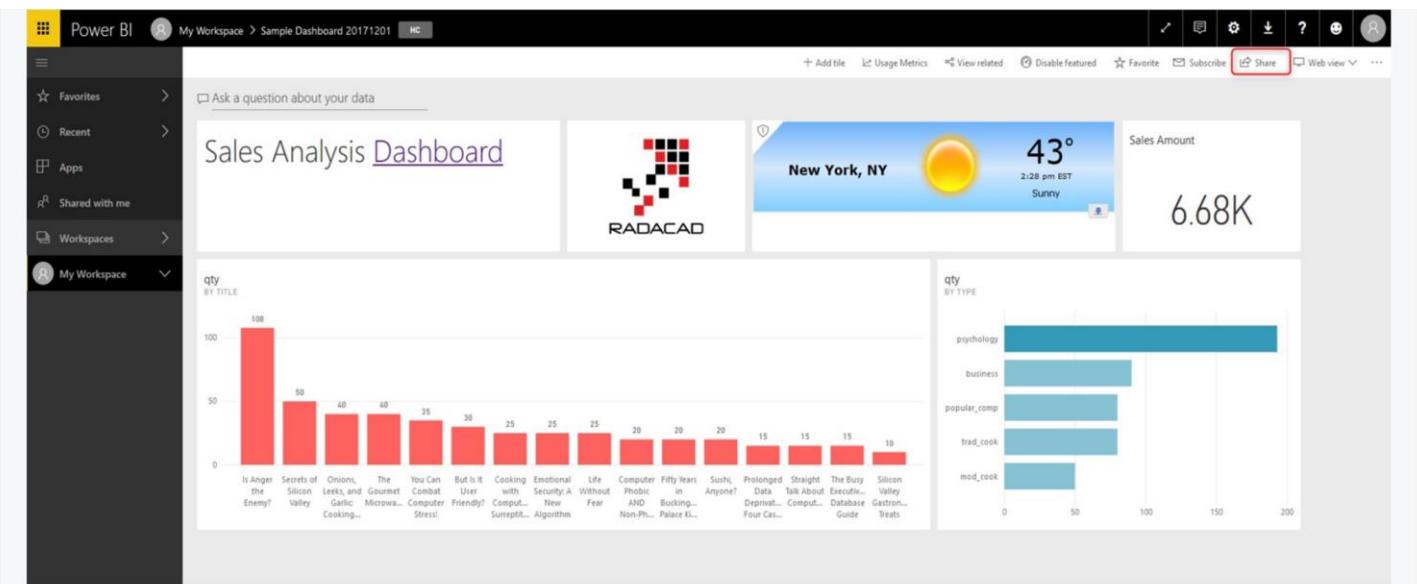

B: Apps are great sharing method for multiple environment, and best way of sharing for users in production environment.

Power BI App is the solution for multiple environment approach. With Power BI App, your development environment (workspace), and user environment (App) are isolated from each other.

Note: If you are using SharePoint online as a portal for document management and some other reasons already, then consider using Embed in SharePoint Online feature of Power BI reports. This method is secure and you can share the report only with Power BI users you want.

E: Sometimes, you don't need a secure way of sharing, you may search for an easy and free way of sharing, and your content is not confidential or sensitive.

Publish to web is your friend in such situation. This is the only free way of sharing in Power BI, but be aware that this method is not secure.

Publish to web method, gives you an embed code, which you can use in any web pages to embed the Power BI report in it

Reference:
https://radacad.com/power-bi-sharing-methods-comparison-all-in-one-review

Question: 65

Your company has an on-premises Microsoft SQL Server database that contains legacy sales data. You must display information from the database in a new
Power Apps app.
You need to establish a secure connection between the database and the app. What should you use?

    A. Data source

    B. App

    C. Data gateway

    D. Power Automate

Answer: C

Explanation:
For an on-premises database, identify a data gateway that was shared with you (or create one).

Specify Connect using on-premises data gateway, type or paste the server name, the database name, the user name, and the password for the database that you want to use, and specify the authentication type and the gateway.

Question: 66

A recent update has been made to a canvas app.
The update causes usability issues.
You need to roll back the app to a previous version.
What should you do?

A. Restore the previous version of the app.

B. Uninstall the app for all users and reinstall by using the package from a previous version.

C. Deactivate the live app, import the previous version of the app, and then activate the app.

D. Delete the app and create a new app based on the previous version.

Answer: A

Explanation:
Restore a canvas app to a previous version in PowerApps.

Restore an app from your account
1. Open powerapps.com, and then click or tap Apps in the left navigation bar.

2. Near the right edge, click or tap the info icon for the app that you want to restore.

3. Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore. 4. In the confirmation dialog box, click or tap Restore.

A new version is added to your list.

Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/restore-an-app

Question: 67

You are a district manager for a large retail organization. You train each store manager to use Power BI to track sales and daily sales targets.
A store manager remembers learning about the Analyze in Excel option but cannot find the option in their Power BI dashboard.
You need to help the user resolve the issue.
How should you advise the user?

A. Install the Power BI Desktop app.

B. Select the Spotlight button on the dashboard tile.

C. Subscribe to the dashboard and follow the email link.

D. Navigate to the report used by the dashboard.

Answer: D

Explanation:

Reference:
https://docs.microsoft.com/en-us/power-bi/collaborate-share/service-analyze-in-excel

Question: 68

DRAG DROP -
You are a district manager for a large retail company. You want to provide sales managers with deeper sales insights to ensure that they can make more informed decisions for their stores.
Store managers must be able to view data in near real-time.
You need to create and share a Power BI dashboard that can be used by the store managers.
Which tools can you use? To answer, drag the appropriate reporting types to the correct requirements. Each reporting type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.
Select and Place:

Reporting types

Power BI Service only
Power BI Desktop only
Power BI Desktop or Power BI Service

Answer Area

Requirement	Reporting type
Create Power BI dashboards that contain a single store's sales information.	
Share that dashboard with your retail managers.	

Answer:

Reporting types

Power BI Service only

Answer Area

Requirement	Reporting type
Create Power BI dashboards that contain a single store's sales information.	Power BI Service only
Share that dashboard with your retail managers.	Power BI Service only

Explanation:

Question: 70

DRAG DROP -
A company plans to display support call metrics on a screen that is visible to all call center staff.
You need to recommend solutions to meet the company's requirements.
What should you recommend? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.
Select and Place:

Components

Tile	Theme
Template App	Alert
Treemap	DirectQuery
Page	Workspace

Answer Area

Requirement	Component
Display a chart with incoming calls versus wait time and pin the chart to a dashboard.	
Send a specific user a notification when the number of customer support calls waiting is over 20.	
Display metrics from different datasets that have related data.	

Answer:

Components

	Theme
Template App	
	DirectQuery
Page	Workspace

Answer Area

Requirement	Component
Display a chart with incoming calls versus wait time and pin the chart to a dashboard.	Tile
Send a specific user a notification when the number of customer support calls waiting is over 20.	Alert
Display metrics from different datasets that have related data.	Workspace

Explanation:

Tile

Alert

Workspace.

Question: 71

You create a Power BI dashboard that displays Common Data Model data.
You need to share the Power BI dashboard with coworkers and allow the coworkers to collaborate. What are two possible ways to achieve the goal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

    A. Create a Power BI workspace and grant coworkers permissions.

    B. Publish the dashboard as an app to your coworkers.

    C. Export the data to Microsoft Excel. Make required changes and then re-import the data.

    D. Create a Power Automate flow to export the data into a SQL Server database.

Answer: AB

Explanation:

A. Create a Power BI workspace and grant coworkers permissions.

B. Publish the dashboard as an app to your coworkers.

Create a Power BI workspace and grant coworkers permissions: You can create a new Power BI workspace, add your dashboard to the workspace, and then invite your coworkers to the workspace. You can then grant them permissions to access and collaborate on the dashboard.

Publish the dashboard as an app to your coworkers: You can publish the dashboard as an app, and then share the app with your coworkers. They can then install the app and access the dashboard.

Question: 72

You are using Dynamics 365 Sales.
You need to create a Power BI report that includes customer office locations. The City and State columns must be combined to form one column on the report.
What should you do?

    A. Use Power Query Editor to merge columns.

    B. Import the data.

    C. Export data to Microsoft Excel.

    D. Create a view.

Answer: A

Explanation:

Reference:
    https://support.microsoft.com/en-us/office/merge-columns-power-query-80ec9e1e-1eb6-4048-b500-d5d42d9f0a8d

Question: 73

DRAG DROP -

A company needs to create a series of mobile applications to empower their field engineers to accomplish several tasks with varying degrees of complexity.

Match each app type to its definition. To answer, drag the appropriate app type from the column on the left to its definition on the right. Each app type may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Select and Place:

App types

| model-driven |
| dashboard |
| dataset |
| canvas |

Answer Area

Definition	App type
Quickly create apps for very complex business processes from data in Common Data Service with very little or no code.	App type
Create simple apps with a highly customizable user interface layouts.	App type

Answer:

App types

| model-driven |
| dashboard |
| dataset |
| canvas |

Answer Area

Definition	App type
Quickly create apps for very complex business processes from data in Common Data Service with very little or no code.	model-driven
Create simple apps with a highly customizable user interface layouts.	canvas

Explanation:

Box 1: model-driven -

Both model-driven and canvas apps allow you to easily build business apps. They both share access to the
    Common Data Service providing standard and custom entities. Model-driven apps start with your data model "
building up from the shape of your core business data and processes in the Common Data
    Service to model forms, views, and other components. Model-driven apps automatically generate great UI that
is responsive across devices.

Box 2: canvas -

Canvas apps start with your user experience, crafting a highly tailored interface with the power of a blank
canvas and connecting it to 200 data sources. Canvas apps can be built for web, mobile, and tablet
applications.

Reference:

https://powerapps.microsoft.com/sv-se/blog/introducing-model-driven-apps/

Question: 74

HOTSPOT -

A user is starting to learn about Power Apps.

Which objects should you use? To answer, select the appropriate options in the answer area. NOTE:

Each correct selection is worth one point.

Hot Area:

Answer Area

A Power Apps app can call a [▼]
| connector |
| flow |

Question: 75
What is a benefit of deploying Microsoft 365 and Dynamics 365 apps in the same tenant?

A. You do not need to manually back up data.

B. Both will use the same time zone.

C. You can use Power BI to display data that comes from both environments.

D. You can implement Single Sign-On (SSO).

Answer: D

Explanation:

You don't need Power BI on the same tenant to pull data. Power BI reports can connect to multiple tenants to get data into a single place. C doesn't make sense because you can achieve it regardless.

Question: 76

A company runs a call center to handle customer support inquiries.
The company tracks metrics including the number of incoming calls and call resolution rates. The company wants to display the metrics on a shared screen that is visible to all call center staff.
You need to recommend a visualization solution for the company.
Which Power Platform feature should you recommend?

A. AI Builder

B. Power Automate

C. Power Apps

D. Power BI

Answer: D

Question: 77

HOTSPOT -
You are a regional sales manager for a large internet retailer. You create a series of Power BI reports and dashboards to help sales associates be more productive and increase sales.
Sales are not increasing as expected.
You need to determine if the new reports are being used and send emails to sales associates to provide guidance on how to use the reports and dashboards.
Which features should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.
